

AM2601

8" Two-Way Professional Hi-Fi & Home Karaoke Speaker

Note: The floor speaker bracket is optional.

Description

The AM2601 is an 8-inch two-way professional Hi-Fi & home karaoke speaker featuring specially customized high-quality drivers and an optimized acoustic design. With excellent frequency response and phase characteristics, it faithfully reproduces musical details and dynamic nuances, delivering an authentic and immersive listening experience.

The enclosure is precision-crafted using CNC machining and high-density wood panels with internal reinforcement, effectively minimizing cabinet resonance and delivering pure, natural sound reproduction. It is suitable for high-quality music playback in living rooms, private music salons, multifunctional halls, and other fixed installation environments.

Features

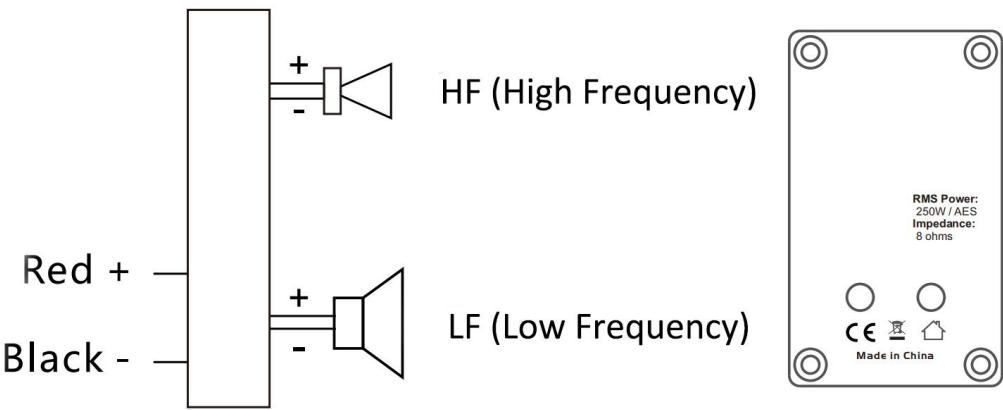

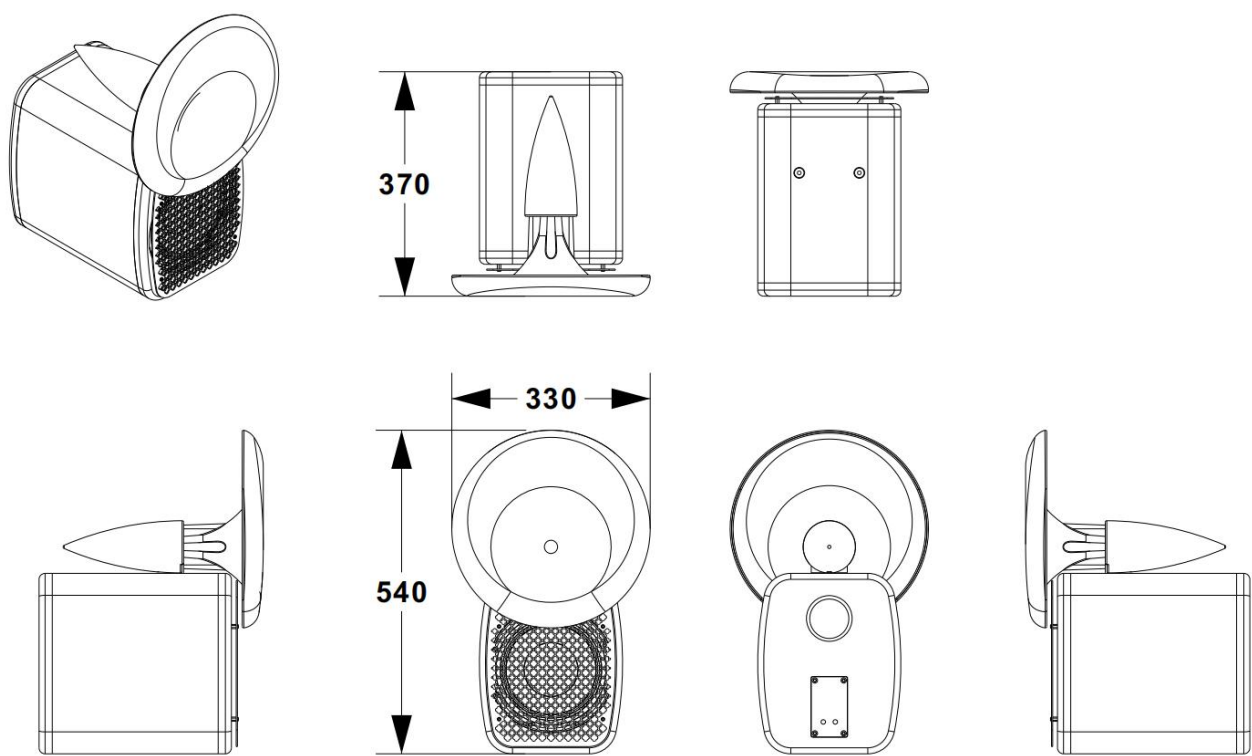

- Rated power 250W, high-efficiency drive system ensures full and powerful sound performance.
- Two-way crossover design delivers excellent phase response and clear sound layering.
- Optimized for near-field listening, accurately reproducing high-fidelity (Hi-Fi) music.
- Equipped with specially customized high-quality European drivers.

Specifications

Model	AM2601
Driver Unit	LF: 8"×1, HF: 1"×1
Rated Power	250W
Peak Power	1000W
Impedance	8Ω

Frequency Response (-10dB)	40Hz–20kHz
Sensitivity (200~16000Hz)	92dB/1W/1m
Max. SPL	116dB (Continuous), 122dB (Peak)
Connector	2×4mm Terminal, Red / Black binding Posts
Enclosure Construction	CNC-machined Cabinet with Recessed Panel Design and Internal Bracing Structure, Made of 15mm + 25mm High-density Wood Panels
Finish	7-Layer Smooth White Water-based Coating
Product Dimensions (H×W×D)	330×370×540 mm
Net Weight	11kg
Gross Weight	13kg
