

AM6604 AM6605 AM6606**Two-Way Full-Range Home Theater Speaker****Description**

This home theater speaker system is designed for premium audio-visual entertainment spaces, including a center speaker, front speakers, and surround speakers, meeting the multi-channel requirements of professional private cinemas and karaoke theater systems. With precise acoustic tuning and high-quality driver units, the system delivers excellent vocal performance, dynamic reproduction, and wide sound coverage, providing a more immersive cinematic listening experience. Featuring a slim cabinet design and flexible installation options, it is well-suited for customized home theaters, clubs, multimedia conference rooms, and other high-end entertainment environments.

Features

- The cabinet is constructed from high-density fiberboard, featuring a matte spray finish combined with a glossy front panel, creating a refined contrast design with a premium visual texture.
- A passive two-way crossover design is carefully tuned to reduce frequency overlap between high and low ranges, resulting in a smoother frequency response and enhanced vocal clarity.
- The system is equipped with a professional-grade high-frequency driver unit paired with an ABS circular horn, ensuring even sound dispersion and wide coverage.
- The low-mid frequency driver uses an imported custom paper cone with a cloth surround, delivering low distortion, high dynamics, long excursion, and high power handling performance.
- With a bass-reflex and ultra-slim cabinet design, the speaker is equipped with standard M8 mounting points, supporting flush-mounted, wall-mounted, and ceiling-mounted installation for flexible deployment.
- It is suitable for a wide range of high-end audio environments, including professional private cinemas, karaoke theaters, customized installations, multimedia experience rooms, clubs, conference rooms, and entertainment spaces.
